Abstract (en)

[origin: EP3929349A1] The invention relates to a garment steamer comprising a steam generator for generating steam, and a steamer head (100) comprising a laser sensor (104) for measuring the distance between the steamer head (100) and a garment placed in front the laser sensor (104). The garment steamer further comprises control means configured to control, based on the measured distance, the delivery of steam from the steam generator.
