Abstract (en)

Assembly for building a window or door into an opening of a building, wherein the assembly comprises a self-supporting frame, which frame has a plurality of reveals, wherein at least two opposite reveals are provided with an inward directed flange so that the window or the door can be moved up against the flange between the opposite reveals, wherein the reveals comprise adjacently of the flange snap elements for snapping the window or door into place when it has been moved up against the flange.
