Abstract (en)

[origin: WO2021209593A1] The invention relates to a cosmetic or dermatological active principle comprising at least one peel hydrolysate of immature Punica granatum fruit, which may be in liquid form, in solid form or in the form of a film. The invention also relates to a composition including same, to a preparation method and also to the use of this active principle for preventing and/or combatting acne.
