Abstract (en)

[origin: WO2021209133A1] The invention relates to a replaceable key milling plate segment for a milling path of a milling plate of a rolling mill, having a ring-like shape with an outer circumference and an inner circumference about a center. The length of the key milling plate segment inner edge lying closer to the center is greater than the length of the outer edge lying remotely from the center. The invention additionally relates to a milling plate segment, a rolling mill, and a method for replacing milling plate segments.
