Abstract (en)

[origin: WO2021209219A1] The invention relates to an industrial truck (100, 200, 300, 400, 500, 500) comprising load receiving means (1) for receiving elongated goods (L) and an elongated goods detection device (2) for detecting elongated goods (L) and comprising a safety controller (3) which has at least one monitoring sensor (4, 4') and which forms at least one protection field (5, 5') using said monitoring sensor (4, 4'), wherein the safety controller (3) interacts with the elongated goods detection device (2) and is designed to influence the at least one protection field (5, 5') on the basis of elongated goods (L) detected by the elongated goods detection device (2).
