Abstract (en)
[origin: WO2021209536A1] Present invention relates to a sectional door system comprising a sectional door leaf (1) having a plurality of horizontal sections (11, 12, 13, 14) movable between a vertical closed position and a horizontal, opened or overhead position within a guiding track system, whereby the sectional door leaf (1) has an inner and outer door surface forming vertical planes when said sectional door leaf (1) is in the vertical closed position. The sectional door leaf comprises a bottom profile (230) with an insulating arrangement (280).
