Abstract (en)

[origin: WO2021211032A1] The invention relates to a modular launching device (1) for launching of projectiles (100) with a propellant charge (10) where the projectile (100) is arranged such that a detonator (20) is arranged at a projectile body (50) in the launching device (1) and assembled together with at least one propellant charge (10) in the launching device (1). Moreover, the invention relates to a method of assembling projectiles in a launching device by using modules.
