Abstract (en)

A Method and an arrangement for commissioning a DALI network for control lighting in a building, the DALI network comprising a DALI application controller, control gears, and input devices, wherein the DALI application controller provides a set of discovered, unassigned input devices and a set of engineered input devices, wherein a commissioning tool provides access to the respective sets of discovered, unassigned input devices, and engineered input devices. The method and the arrangement are in particular applicable to commission DALI-2 pushbutton or analog input devices.
