Abstract (en)  
[origin: US2021323727A1] A vessel comprising a first and second stainless steel component forming a stainless steel drinkware having an interior and an exterior. A first design layer carried by a portion of the exterior leaving a portion of exposed stainless steel exterior forming a stainless steel band around the exterior of said stainless steel drinkware; and a clear coat powder coat comprising a silver based antimicrobial agent carried by the entire exterior of the stainless steel drinkware providing a protective layer for the first design layer and the stainless steel band.
