Abstract (en)

[origin: WO2021214808A1] The apparatus for filling containers with a powdered material comprises a feeding station (5) arranged for feeding a plurality of said containers (2); a filling station (10), arranged downstream of said feeding station (5), comprising a measuring assembly (15) configured to fill each said container (2) with a measured quantity of a powdered material, said measuring assembly (15) comprising at least one pair of measuring members (17). The filling station (10) also comprises a feeding receptacle (18) comprising a containment body (31) adapted to contain a predetermined quantity of powdered material.
