Abstract (en)

[origin: WO2021214189A1] An elevator operating device (6) for inputting a trip request in an elevator system (1) has a first call input device (28), which is communicatively connected to a central control device (40) of the elevator operating device (6), the first call input device (28) comprising keys (23), which are assigned to respective floors (L, L1) of a building (2) and are disposed in the elevator operating device (6) such that the keys are accessible to a first passenger (P) for inputting a destination floor (L, L1). A second call input device (4) of the elevator operating device (6) is communicatively connected to the central control device (40) and is disposed such that the second call input device is accessible to a second passenger (P) for inputting a destination floor (L, L1) in steps. The first call input device (28) and the second call input device (4) are disposed at a distance from each other with respect to passengers.
