Abstract (en)
[origin: WO2021214422A1] The invention relates to a coated and varnished membrane (1, 10), said membrane comprising at least one fabric (2) having at least one face coated with at least one layer of polyvinyl chloride (31, 32), and at least one varnish film (41, 42) on said coated surface of the membrane, said varnish film (42) comprising a polymeric binder and silver (4) in the form of a silver element having a size of less than 250 nm. The invention also relates to a method for producing a membrane (1) according to the invention. The invention further relates to a use of a membrane (1) according to the invention as a virucide.
