Abstract (en)

[origin: WO2021219343A1] The invention relates to a control element (100), for example for a vehicle (1000), which control element has at least one tubular section (2) with a chamber (4) at least partially enclosed by a wall (3) and a piezoelectric component (1) which is located in the chamber and is provided and designed to generate a haptic signal on at least one portion of the control element and/or to detect a pressure acting on at least one part of the piezoelectric component. The invention further relates to a vehicle (1000) with the control element (100).
