Abstract (en)

[origin: WO2021219240A1] The closing system (4) for a container (2) includes a spout (8) and a cap (6), the cap being attached to the spout with a hinge (12) and screwed on the spout. The cap or the spout is equipped with a positioning protrusion (18) provided inside the cap and designed for cooperating with a positioning tool (202), the positioning protrusion having a bearing surface (184) radial with respect to a rotation axis (X8) of the cap, when it is screwed on or unscrewed from the spout.
