Abstract (en)

[origin: WO2021252979A2] In some embodiments, an electronic device displays suggested routes based on the characteristics of respective vehicles. In some embodiments, an electronic device receives data for respective vehicles from a source external to the electronic device. In some embodiments, an electronic device anonymizes a vehicle identifier and determines customized suggested routes using the anonymized vehicle identifier. In some embodiments, Starting Charge Maps and/or Buffer Maps are generated and/or utilized for route generation or suggestion.
