Abstract (en)

[origin: WO2021219646A1] The present invention relates to a mechanical timepiece movement comprising a chronograph mechanism arranged to be able to carry out at least one countdown of a predetermined time interval, comprising display means arranged to display at least the time remaining until the end of the countdown of the predetermined time interval, at least one member for controlling the start of the countdown, and a striking mechanism. The striking mechanism is arranged to start striking at a specified time before the end of the countdown and to stop striking at the end of the countdown of the predetermined time interval.
