Abstract (en)
[origin: WO2021219439A1] The invention relates to a hand-held machine tool (1) comprising a drive device (4), by means of which a tool that can be operatively connected to the machine tool (1) can be actuated, further comprising a control device (8) for actuating the drive device (4), and at least one capacitive sensor element (30, 35) that is operatively connected to the control device (8). The at least one machine tool element (2, 75) located in the area of the capacitive sensor element (30, 35) is connected to earth.
