Abstract (en)

[origin: WO2021224424A1] The invention deals with the area of beverage preparation, in particular coffee, while using a portion capsule and relates to a portion capsule (1) with a base element (11) for receiving an extraction product, to a method for producing the portion capsule, to a composite material which can be particularly efficiently produced in the field of coffee portion capsule production, and to a method for producing the composite material. The composite material has a component which is produced from the silverskin of coffee cherries, and a portion capsule (1) according to the invention comprises said composite material.
