Abstract (en)

[origin: WO2021225491A1] A defibrator system comprising: a preheater (3), a defibrator (7), a feed screw arrangement (11) and a return steam pipe (23) configured for transferring steam from the feed screw arrangement to the preheater, wherein the return steam pipe comprises a sensor arrangement (31a) which can measure a feature that can be used for evaluating if there is a stop or reduced possibility for the steam to pass through the return steam pipe. A return steam pipe arrangement and a method for defibrating wood chips are also disclosed.
