Abstract (en)  
[origin: WO2021223997A1] Modular compactable prefabricated structure (P2) comprising a front module (M2) and a back module (M2') of folding type; the front module comprises a quadrangular bottom (1) comprising a front side (11), an intermediate side (17), a right-hand side (15) and a left-hand side (16); and a folding front wall (3) hinged to the front side (11) of the bottom (1) of the front module by means of hinging means (13); the back module comprises a quadrangular bottom (1') comprising a back side (12), an intermediate side (17'), a right-hand side (15') and a left-hand side (16'); and a folding back wall (3') hinged to the back side (12) of the bottom (1') of the back module by means of hinging means (13'); wherein the intermediate side (17) of the bottom of the front module is suitable for going in contact with the intermediate side (17') of the bottom of the back module and no wall is connected in the intermediate sides (17, 17') of the front module and of the back module in such a way that the prefabricated structure has a continuous space between the front wall (3) and the back wall (3').
