Abstract (en)  
[origin: WO2021225534A1] The invention relates to a mounting assembly for an oven, particularly domestic oven, comprising a first side panel (21); a second side panel (23); a base panel (22) and a cavity (10) mounted therebetween; a connection plate (30) connected to the first and second side panel (21, 23) by extending from the opposite ends behind the cavity (10); a mounting hole (33) on the connection plate (30). The mounting assembly comprises a connection element (40) which is adapted according to a first step height (H1) defined between the base panel (22) of the first oven (1) and the mounting opening (33) and a second step height (H2) that is different from the first step height (H1) of the first oven (1) and defined between the base panel (22) of the second oven (2) and the mounting opening (33), and which secures the connection plate (30) to the first side panel (21) and the second side panel (23) in the corresponding step height (H1, H2) when applied to the first oven (1) or second oven (2).
