Abstract (en)

[origin: WO2021224060A1] The invention relates to a heat exchanger assembly (1) for a refrigeration device (100), comprising a condensed water tray (2) for receiving condensed water discharged from a cooling compartment (110) of the refrigeration device (100); and a heat exchanger (3) with a housing (30), a refrigerant line assembly (33) arranged in an inlet opening (31) of the housing (30), a ventilator (34) which is arranged in an outlet opening (32) of the housing (30), and a sealing plate (4) which projects from the housing (30) and protrudes into the condensed water tray (2).
