Abstract (en)
[origin: CA3178781A1] The invention relates to an edible food casing based on leavened dough, consisting of two pieces of dough rolled out into a circular shape, a first piece of dough forming a rest for certain foodstuffs, and the second piece of dough being arranged over the deposited amount, a closure being produced between the first and second pieces of dough via the edge region, and the pieces of dough being subjected to a baking temperature treatment to harden the casing and the closure.
