Abstract (en)

[origin: WO2021228948A2] The invention relates to an assembly (1) formed by at least one drawer side wall (2) and at least one connection device for connecting the at least one drawer side wall (2) to at least one further drawer wall (3), in particular a front panel, wherein the at least one connection device comprises at least one retaining device (4) this is/can be arranged in the at least one drawer side wall (2) and at least one mounting device (5) that can be secured to the other drawer wall (3), having at least one retaining device (3), at least one retaining bar (6) and at least one guide (7), and the at least one retaining bar (6) is arranged such that it can move in the at least one guide (7) between a retaining position in which the at least one retaining bar (6) retains the mounting device (5), and a release position in which the at least one retaining bar releases the mounting device (5), wherein the at least one guide (7) is bent at least in regions in a longitudinal plane (8) of the at least one drawer side wall (2), preferably being circular at least in sections, wherein the at least one retaining bar (6) is substantially plate-shaped and is arranged substantially in a longitudinal plane (8) of the at least one drawer side wall (2).
