Abstract (en)  
[origin: WO2021229402A1] A saddle assembly (10) for bicycles comprising a saddle (12) and means for stabilizing and supporting said saddle at one end (13') of a seatpost tube (13) of the bicycle, the saddle (12) comprising a hull or shield (12") defining a seat for a rider, a support frame (12') arranged supporting said saddle and comprising a sheet or leaf (12A) and means for coupling said sheet or leaf (12A) with respect to the seatpost tube (13), the coupling means comprising means for adjusting the distance of the saddle (12) with respect to a handlebar of the bicycle defined in the connection between said sheet or leaf (12A) and the coupling means and means for adjusting the inclination of the same saddle (12) with respect to a horizontal plane defined in the connection between said coupling means and the seatpost tube (13).
