Abstract (en)

[origin: WO2022002661A1] The invention relates to an automated method for generating a monitoring model of a monitor for monitoring a working model of an artificial intelligence, - wherein a classification of input data is carried out by means of the working model, and - wherein the monitoring model is trained using a representative volume of data of the working model. The invention also relates to an associated device, an associated computer program product and an associated computer-readable medium.
