Abstract (en)
[origin: WO2021228367A1] The invention relates to a switch device (3) for supplying at least one load with electric energy, wherein the switch device (3) comprises at least one output (34, 35, 36, 37), and the output (34, 35, 36, 37) is used to change a first electric state of the electric load to a second electric state of the electric load. According to the invention, the switch device (3) comprises a communication device (32) for wirelessly communicating with a mobile device (10, 11).
