Abstract (en)  
Whirlpool device, which comprises at least one first support (1) provided with a nozzle (2) suitable to emit a mixed flow (3) of air and water, as well as a second support (12) suitable to be fixed to the first support (1) and to a wall of a whirlpool tub (4), wherein the first support (1) comprises at least two openings (10) and at least two nozzles (2) suitable to emit a mixed flow (3) through these openings (10), and wherein the second support (12) comprises at least one further opening (17), so that the nozzles (2) can emit the mixed flow (3) also through the opening (17) of the second support (12) when the second support (12) is fixed to the first support (1). The present description also relates to a whirlpool tub (4) comprising said device.
