Abstract (en)

[origin: US2021360960A1] The present specification provides for and includes novel methods of curing tobacco to produce desirable smoke and flavor characteristics while reducing the undesirable compounds imparted during a conventional fire-curing process. The present specification provides for and includes cured tobacco having reduced polyaromatic hydrocarbons and TSNA as compared to conventionally fire-cured tobacco. Also provided are tobacco products made with tobacco leaf cured using the disclosed processes.
