Abstract (en)

[origin: WO2021233614A1] The invention provides a composition for providing scalp care benefits by selectively supporting the growth of beneficial commensal microbial strains in the human scalp microbiome, the composition comprising at least one biotin binding compound and at least one precursor for biotin biosynthesis selected from pimelic acid, salts thereof or an anhydride thereof. The invention also provides the use of pimelic acid, salts thereof or an anhydride thereof, in combination with at least one biotin binding compound, for providing scalp care benefits by selectively supporting the growth of beneficial commensal microbial strains in the human scalp microbiome.
