Abstract (en)

[origin: WO2021234055A1] The invention provides a composition for providing skin care benefits, such as reducing and/or preventing axillary malodour, by selectively supporting the growth of beneficial commensal *S.epidermidis* and/or *C. acnes* strains in the human cutaneous microbiome, the composition comprising at least one biotin binding compound and at least one precursor for biotin biosynthesis selected from pimelic acid, salts thereof or an anhydride thereof.
