Abstract (en)  
[origin: WO2021234238A1] The invention relates to - a method for manufacturing a printed laminated glass panel comprising at least one transparent sheet adhered to an intermediate adhesive layer, characterised in that the intermediate adhesive layer is obtained from at least a first and a second partial intermediate adhesive layer, in that one of the two main faces of the first or the second partial intermediate adhesive layer is printed with an ink, in that the transparent sheet, and the first and the second partial intermediate adhesive layers are joined such that the printed main face of the first or the second partial intermediate adhesive layer is in direct contact with the second or the first partial intermediate adhesive layer, and in that the lamination is subsequently carried out; and - the use of a printed laminated glass panel thus obtained as an automotive glass panel such as a windscreen, or as a glass panel for building, solar energy or industrial purposes.
