Abstract (en)
[origin: WO2021234636A1] A woven fabric comprising spun synthetic polyamide yarn woven in the warp direction and weft direction wherein the polyamide yarn in the woven fabric exhibits a formic acid relative viscosity of at least 60, a halide:copper molar ratio of at least 2.0 and a sodium content of no more than 25 ppm, and wherein the woven fabric exhibits a melt-through resistance at 450°C of least 2.10 seconds. The invention also provides an airbag made the woven fabric, as well as a method of making the same.
