Abstract (en)

[origin: WO2021233512A1] The invention relates to a dry-construction connector (1) comprising at least one body (50) having a first end portion at a first end and a second end portion at a second end, wherein the body (50) has a central portion (4) between the first and the second end portion, wherein the first end portion forms a retaining tongue (2) for connecting to a beam (10) and the second end portion forms a load-bearing tongue (3) for connecting to a dry- construction profile (23, 23'). The invention further relates to a dry-construction arrangement comprising at least one dry-construction connector (1), a kit for constructing a ceiling in dry construction and a method for constructing a ceiling.
