Abstract (en)
[origin: WO2021234083A1] The present invention relates to a method for recording and providing measured values and data, in which measured values and times are first of all recorded. The measured values are then stored in a RAW time grid. A first portion of the data of the recorded measured values is then stored in a first time grid, wherein the first portion of the recorded measured values comprises fewer data than the stored recorded measured values.
