Abstract (en)  
[origin: CN115844130A] The invention proposes a container for a cosmetic product made of a single plastic material, the container (1) for dispensing a cosmetic product comprising: a base (2) adapted to accommodate a cup (34) containing the product; a lid (3) rotatable between a position in which the container (1) is closed and a position in which the container (1) is open, the lid being connected to the base (2) by a first hinge connection at the rear of the container (1); and a platform (4) capable of rotating and clamping the cup in place in the base. The container further comprises means for braking the lid (3) when the container is opened and closed and means for braking the platform when the container is opened and closed, said means for braking the lid (3) when the container is opened and closed being located at the rear of the container (1), the means for braking the platform when opened and closed are likewise located at the rear of the container.
