Abstract (en)
Device for water treatment in swimming pools and spas, attachable to a water delivery nozzle for gradual release of water treatment products housed inside porous capsules (4). It comprises a body (1) with two opposite ends. At one end there is a through opening (2) for coupling with the nozzle, and a fastening element (6). At a second end, opposite the first end and separated from it, so that it is separated from the water flow of the discharge nozzle, there is a chamber (3) for housing the capsules (4) of product stacked together, comprising support means (10) for coupling the capsules (4) stacked together, a hinged lid (9) for opening and closing the inside of the chamber (3), and through holes (11) for connecting the inside of the chamber (3) with the outside.
