Abstract (en)

[origin: EP4155226A1] A closure (10) has an annular wall (16) comprising an annular skirt (20), a safety ring (18) as well as a first and a second tethers (22, 24) permanently connecting the annular skirt (20) to the safety ring (18) delineated by a first incision line (30) and a second incision line (40), which do not converge with one another. In in the region of the tethers (22, 24), the incision lines overlap and extend right through the annular wall (16) without frangible bridges, whereas in other non-overlapping regions they are provided with frangible bridges (54, 56).
