Abstract (en)

A liquid discharge apparatus (2) includes a head (21) and an adjuster (22). The head (21) discharges liquid onto a linear medium based on image data. The adjuster (22) is disposed downstream from the head (21) in a feed direction of the linear medium and adjusts a feed speed of the linear medium. The adjuster (22) increases a feed distance of the linear medium in a case where the feed speed is lower than a predetermined value.
