Abstract (en)

[origin: WO2021239897A1] The present invention relates to a process for producing a preserved food item (1) from a raw material (2), in particular for producing a snack product, comprising the following steps: treating the raw material (2) by applying an electrical field; bringing the treated raw material (2) into contact with an aqueous medium (3); and preserving the raw material (2) to form a food item (1), after the bringing-into-contact step. In order to exclude contaminants occurring during the production of preserved foods and to provide a consistent product quality, the following method steps are provided according to the invention: determining a measured value (4). The present invention also relates to an installation (6) for producing a preserved food item (1) from a raw material (2).
