Abstract (en)
The present invention relates a tapping unit (1) for tapping a beverage (B) with foam (F), in particular beer (B) with foam (F). Said tapping unit (1) comprises a first line (L1), having an inlet (L11) for receiving a quantity of beverage (B) and an outlet (L12), a second line (L2), different from the first line (L1), having an inlet (L21) for receiving a quantity of beverage (B) and an outlet (L22), a first valve (V1), arranged on the first line (L1), a second valve (V2), arranged on the second line (L2), as well as a logic control unit (U) configured to send a first control signal for opening the first valve (V1) so that at least a quantity of beverage (B) is present at the outlet (L12) of the first line (L1), and to send a second control signal for opening the second valve (V2) so that at least a quantity of foam (F) is present at the outlet (L22) of the second line (L2). The present invention also relates to a method for tapping a beverage with foam.
