Abstract (en)
Disclosed is a lamp which includes: a body (1); a mounting plate (2) mounted with an electrical assembly (3) and having a clamping member (21) and an end provided with a first positioning groove (22); a clamping plate (4) fixed on the body (1); a positioning member (5) including a positioning plate (6) fixed on the body (1) and a knob (7) movable along a vertical direction and rotatable around an axis of the knob (7). The knob (7) is provided with a first protrusion (71) to engage with the first positioning groove (22) and drive the clamping member (21) to abut against the clamping plate (4). The installation and disassembly of the electrical assembly (3) are greatly facilitated. The electrical assembly (3) can be quickly taken out and replaced with a new electrical assembly (3). The electrical assembly (3) can be installed or disassembled without removing the lamp from the lamp's installation position. Thus, the maintenance efficiency of the lamp is greatly improved.
