Abstract (en)
[origin: WO2021244859A1] The invention relates to a food processing device (10a; 10b; 10c), in particular a cooking vessel device, with at least one stirring unit (12a; 12b; 12c) and with at least one drive unit (16a; 16b; 16c) arranged in an upper region (14a; 14b; 14c) of the stirring unit (12a; 12b; 12c) for driving the stirring unit (12a; 12b; 12c). In order to advantageously further develop a generic device, it is proposed that the food processing device (10a; 10b; 10c) comprises a magnetic coupling unit (18a; 18b; 18c) which is provided to magnetically transmit a drive torque from the drive unit (16a; 16b; 16c) to the stirring unit (12a; 12b; 12c) via at least one intermediate space (20a; 20b; 20c)
