Abstract (en)  
[origin: WO2022174854A1] The invention relates to a wakeboard or surfboard comprising an electric drive together with a controller and an internal power supply in the form of a rechargeable energy storage element (rechargeable battery), wherein the drive and the rechargeable battery are integrated into the board, and at least the rechargeable battery can be removed from the board. The wakeboard or surfboard is characterized in that at least one camera, preferably with a combined video/sound function, is permanently assigned to the board, said camera being positioned or positionable and if necessary being adjustable such that the camera is suitable for capturing the operator on the board while riding.
