Abstract (en)
[origin: WO2021245608A1] The present invention relates to a new family of bio-based composite materials, the method for manufacturing the same, and moreover the method for the coating of fungal mats derived from living fungal paste or slurry by using a bio polymer or resin manufactured thereby, and to the products obtained therefrom, in particular for application in the soft goods market, as for example leather, leather-like, fabrics, upholstery and textile-like products.
