Abstract (en)

[origin: WO2021245364A1] Disclosed is a method for exchanging information between one or more satellites (4) and a terrestrial transmitting and/or receiving station (2) connected to an information processing site (3). The exchanged information is certified and encrypted before being transmitted from the terrestrial transmitting/receiving station (2) to one or more of the satellites (4), or from one or more of the satellites (4) to the terrestrial transmitting/receiving station (2).
