Abstract (en)
[origin: WO2021257754A1] The present disclosure relates to compounds capable of inhibiting vascular endothelial protein tyrosine phosphatase (VE-PTP). These compounds are also capable of activating Tie2 receptor-mediated signaling. The present disclosure also relates to pharmaceutically acceptable salts of said compounds, to pharmaceutical compositions comprising such compounds and/or pharmaceutically acceptable salts thereof, and to the use of such compounds, pharmaceutically acceptable salts thereof, and/or pharmaceutical compositions comprising the same in treating diseases and/or conditions mediated by VE-PTP signaling, such as those mediated by Angiopoietin/Tie2 signaling.
