Abstract (en)  
[origin: WO2022106162A1] The invention relates to a sterilization device, in particular for the treatment of gaseous media, such as ambient air, for rendering harmless and removing microorganisms from a media flow, at least comprising a separating device (10), through which the media flow is guided, and a killing device (12) located downstream thereof, as viewed in the direction of the media flow, along which the media flow is at least partially extending.
