Abstract (en)
[origin: WO2021250354A1] Pump attachment member (1) produced by plastic moulding, comprising a skirt (11), an annular plate (13) and a receiving sleeve (14) defining a receiving recess (L) formed by a moulding pin which is forcibly withdrawn on release from the mould, the receiving recess (L) comprising an inwardly projecting annular inlet rib (15), the attachment flange of a distribution member being held in the receiving recess (L) by said annular engaging rib (15), characterised in that the annular inlet rib (15) comprises retaining segments (16) for engaging with the attachment flange (R2) and mould release segments (17) for engaging with the moulding pin on release from the mould.
