Abstract (en)
[origin: CN116235192A] The invention discloses a high-adaptability manufacturing system, method and equipment. An apparatus for manufacturing a product according to the present disclosure may include a design apparatus, an assembly apparatus, and a control apparatus coupled to the design apparatus and the assembly apparatus. The control device receives input information from the design device and the assembly device. The control device provides output information for changing at least one parameter used by at least one of the design device and the assembly device in product manufacturing.
